First Time Buyers: If you've never made an acquisition before, what you don't know could have long-lasting and potentially financially crippling affects.

While your lawyer and/or accountant can help you to avoid some pitfalls, there are non-legal and non-accounting issues they often miss.

We can help:

- Work with you through the process
- Review due diligence documentation
- Be sure you ask the right questions

Seasoned Professionals: If you're considering a number of potential acquisitions, you could waste a lot of time and effort on a deal only to find out that the seller was not prepared, or that what they said wasn't completely factual.

We can help:

- Pre-qualify potential acquisition targets
- Save you time and money by preparing the target company for due diligence
- Avert the last minute deal busters
- Provide a detailed report on the state of the business

About Put It Together, LLC

Put It Together was founded by James Witham and Karen Laustsen to help small business owners get prepared to sell their business. Having acquired several companies across a broad spectrum of industries, they faced extreme frustration working with business owners who were not ready for the rigorous process of selling their business.

Put It Together provides unique personalized one-on-one workshops for business owners designed to prepare them to sell their business. They also provides consulting services for business brokers and for buyers of businesses.

The Founders have pursued acquisitions for both financial and strategic purposes when operating both private and publicly held corporations. They have personally conducted due diligence on numerous companies, and closed both stock and asset acquisitions ranging from less than a million to over \$25,000,000. Mr. Witham has served as Chairman and CEO of five publicly traded companies and is a recipient of the prestigious Ellis Island Medal of Honor.

Mr. Witham and Ms. Laustsen have authored *Selling Your Business? Get Prepared!* a straightforward guide to help entrepreneurs get prepared to sell their business.
